AN APPLICATION OF
HONEYWELL ENTERPRISE BUILDINGS INTEGRATOR

The First Step towards
Energy Optimisation
What is Energy Express?

Integrated seamlessly with Honeywell Enterprise Buildings Integrator (EBI), Energy Express is a scalable energy monitoring and automated energy reporting solution, providing real-time actionable awareness. Easily tailored to numerous individual user and reporting requirements, Energy Express provides you with information to act promptly and advance your energy efficiency goals without compromising comfort or productivity. This is achieved through:

- **Seamless integration** with your EBI to provide a familiar user-interface and easy access to compiled meter data from your facility’s subsystems
- **Flexibility for individuals or groups** with your EBI to provide a familiar user-interface and easy access to compiled meter data from your facility’s subsystems
- **A portfolio of 20 ready-to-go energy reports** which are easily tailored to specific facility needs
- **The integration of standard meter protocols** using available infrastructure.

Honeywell Energy Express provides a scalable and flexible solution and is the smart first step in your journey towards energy optimisation.

Brighter Outcomes with Honeywell ENERGY EXPRESS

Optimising the energy efficiency of your facility can deliver many benefits. Whether you are attracting a higher calibre of tenant, adhering to legislation or simply looking to reduce energy expenditure, your journey towards energy optimisation needs to start somewhere.

Honeywell Energy Express provides a scalable and flexible solution and is the smart first step in your journey towards energy optimisation.

What’s possible with Energy Express?

You can’t manage what you can’t measure. Honeywell Energy Express helps empower facility managers with the tools and knowledge to:

- Better manage consumption patterns
- Advance legislative compliance goals
- Contribute towards ISO50001 / 14001 / 15232 in addition to green certifications such as LEED, BREEAM or NABERS
- Automate reporting and allocate costs as used by tenants or internal cost centres
- Reduce costs by optimising demand side management
- Negotiate improved energy rates with suppliers
- Reduce risk
- Identify cost-saving opportunities
- Validate energy conservation projects
- Promote behavioural change by providing visibility on facility targets and procedures
- More accurately allocate cost to where energy has been used

Whether you are looking for step changes in efficiency or sustained performance through proactive monitoring of your building, we are ready to help.

What does the Energy Express reporting tool do?

The Energy Express reporting tool transforms data captured throughout your facility into actionable, automated real-time reports so you can take the next step towards achieving your energy goals.

With immediate access to a portfolio of reports, you can save time through allocating energy costs used by specific cost centres. Having the information to act enables you to influence people’s behaviour and promote a sustainable mind-set helping to reduce costs.

Portfolio Of Reports At Your Fingertips

- Daily Weather Conditions
- Daily Demand Range
- Demand Calendar
- Meter Profile
- Raw and Clean Meter Readings
- Total Usage
- Facility Profile Comparison
- Daily Comparison
- Billing Summary
- Bulk Invoice Management
- Cost Comparison
- Cost History
- Invoice
- Invoice Validation
- Daily Consumption
- Daily Demand Range
- Demand Calendar
- Meter Profile
- Raw and Clean Meter Readings
- Total Usage
- Facility Profile Comparison
- Daily Comparison
- Daily Weather Conditions
- Demand Distribution
- Facility Energy Signature
- Energy Monitoring Reports
- System Configuration Reports
- Cost Reports
- Performance Monitoring Reports
- Billing Configuration
- Meter Configuration
- Meter Reading
A Trusted Source For Energy Efficiency

Managing energy doesn’t have to be complicated or time consuming. Whether you are seeking a solution to help reduce your energy consumption or better manage your energy costs without compromising comfort, productivity or legislative compliance, Honeywell’s portfolio of energy solutions provides freedom of choice depending upon where you are in your journey to energy optimisation.

Energy Express is just one of the solutions from Honeywell that is empowering facilities around the world on their journey to energy optimisation and cost reduction. Depending upon your long-term energy ambitions, you have the flexibility to build on your existing investment and continue your journey towards energy optimisation with Honeywell Energy Manager, Honeywell Attune™ Advisory Services and more.

Honeywell has been a leader in energy management and automation for more than 100 years. With more than 60 percent of Honeywell’s portfolio of products directly linked to energy efficiency, we are ideally positioned to help your organisation meet its sustainability goals, with technology and services that are effective, environmentally conscience and cost efficient.

Our dedicated and trained energy experts have provided automated, integrated and managed energy solutions across approximately 5,000 projects worldwide, helping our customers save upwards of US$4 Billion in energy and operational gains.

Contact Honeywell today to find out the right energy solution for you.
